

## Web EDI-FAQ

### Why are materials not available for the shipping process?

Thomas Gries / 7/17/2006 12:07 PM

## Shipment on Delivery date

If you are working with shipment on delivery date, only firm quantities are proposed for the shipping.

Example:

**New shipment to**

BN01 Werk Bietigheim Wischer / WMUT2 | Delivery date | 06/12/2006 |

Information: Open deliveries from: 06/08/2006 up to: 06/11/2006 will be additionally included into the new shipment.

If you create a shipment for the 12<sup>th</sup> of June, you get a proposal of all materials with firm quantities for this date. Depending on the parameters in WebEDI for the different plants, you get also data in the past as proposal, this is a special backlog parameter some plants are using. In the case this parameter is active, you get the information about the time horizon which is used.

Firm quantities are marked in the delivery instruction as firm:

Items			
Delivery date	Despatch qty	Cum. quantity	Comm. level
May 22, 2006	111	5546	Firm
May 24, 2006	200	5746	Firm

## Shipment for extra delivery

If you are working with extra delivery and a material could not be chosen in the list of materials, then there is no active delivery instruction for this material available.
